Attn: Ms. Kenya A. McLaughlin,

Subject: Patent #6,108,992

Dear Ms. McLaughlin:

Thank you for your second response to my submission for Petition for Reinstatement under 37CFR 1.378(B) filed April 18th, 2011. I received this response on Sept. 12, 2011. After reviewing your points, and in particular the decision of Link vs. Wabash (1962), it becomes obvious that I was insensate in conveying the full responsibility of the Patent maintenance fees to Mr. Arff. Had I known that I would have had to engage in this problematical situation due to the dalliance of Mr. Arff, things would have been arranged differently. Please don't think I was insouciant about this matter.

I cannot say why Mr. Arff did not pay the maintenance fee or if in fact it was unavoidable. I have no knowledge of Mr. Arff's tracking or docketing procedures.

At this point in time I feel I was fortunate to obtain the previously submitted documents from Mr. Arff. As you can probably surmise, this series of events has created certain frictions between Mr. Arff and me.

Personally, I feel that Mr. Arff was then, and is now going through a rough spot in his life, creating a serious drift in our 30 year relationship. Could this be deemed "unavoidable"? I don't know.

As you stated, it was my sole responsibility to contact the U.S.P.O. with a status update. This I failed to do because I foolishly trusted Mr. Arff's assurance to me, and secondly because I was engaged in some serious heart related issues, which have since been rectified.

I'm hopeful that the enclosed will enable a favorable decision from the U.S.P.T.O. Should my petition be rejected, I would appreciate you or someone providing me with the forms necessary to recover the monies forwarded to and cashed by the U.S.P.T.O prior to my submission.

Yours truly,

John G. Shaw

To Whom It May Concern:

Mr. John G. Shaw has asked for this letter to indicate that he is currently hospitalized in the Intensive Care Unit at Upper Valley Medical Center in Troy, Ohio, and unable to be discharged at the present time.

This letter supports that this is indeed the case. Mr. Shaw can provide further details of his condition as he feels is indicated.

Sincerely,

Barbara Harbor Evert, MD

Date: Nov 4/10Leading with Innovation
Serving with Compassion**ST. MICHAEL'S HOSPITAL**

A teaching hospital affiliated with the University of Toronto

RECEIVED
CENTRAL FAX CENTER
SEP 15 2011Dear Mr. Shaw:

Dr Fam has referred you for a coronary angiogram. This information is provided to assist you through the admitting process.

You are asked to come to the St. Michael's Hospital admitting department on Wed Nov 10 at 10 a.m. for your admission. You will then be directed to the Cath Lab recovery room on 7 Cardinal Carter Wing.

In preparation for your angiogram Dr. Fam's office has had your pre-admission tests done and the results will be forwarded to St. Michael's Hospital.

The hospital provides no parking but there are private parking lots in the area. Parking can be quite expensive. **You may to stay over night.** Please make arrangements for transportation home either following the procedure or on the next morning. Discharge time is 9:00 am if you stay overnight. You may not drive yourself or take public transportation alone. If a family member accompanies you to the hospital please be aware that there is no accommodation available for that person overnight at St Michael's. There are however many hotels in the vicinity. There is an optional \$10.00 service charge for the use of phones during your hospital stay, but pay phones are available as an alternative. Please bring change or a phone card if you wish to use the pay phone.

Before you leave home, remember to bring the following to the hospital with you:

- All medications that you are taking currently in the original bottles
- Your Health Insurance Card or Workers' Compensation Board number, passport or personal identification
- Information about additional health insurance (i.e. Green Cross , Blue Shield)

I am enclosing information about the angiogram and a Respiratory Screening Tool for you to complete on the morning of your admission. You are registered with Cardiac Care Network (CCN). I have enclosed a brochure about the CCN and more information is available at: www.ccn.on.ca. Please notify me if there is any change in your condition while you are waiting for your test. The waiting time for cardiac catheterization/angiogram may vary from centre to centre. If you wish to discuss having your cardiac catheterization/angiogram, done at a centre with a shorter waiting time, as the regional cardiac care coordinator I would be happy to discuss your options with you. You can contact me at 416-864-5489.

Sincerely,

Patricia Daniels RN, BA
Regional Cardiac Care Coordinator/Case Manager

Heart and Vascular Discharge Summary

30 Bond Street
Toronto, Ontario
M5B 1W8
(416)360-4000

PRELIMINARY

Patient's Name: JOHN SHAW
Date of Birth: 1940-07-15
MRN: 2617068
Admission Date: 2010-11-15
Discharge Date: 2010-11-21

Admitted from:

Home

Discharge to:

Home

DIAGNOSIS MOST RESPONSIBLE FOR STAY:

Coronary artery disease

Surgical Procedures:

1. 2010/11/16 CABG x 3: LIMA-LAD, SVG-OM1, SVG-PIV

Pre-admission Co-morbidities:

1. Ex Smoker (Quit 30yrs)
2. NSTEMI 10/29/2010

Cardiac Risk Factors:

1. Dyslipidemia
2. Hypertension

Initial Presentation:

Mr. Shaw was referred for elective cardiac surgery. He has known to have coronary artery disease having suffered a myocardial infarction in 2007 and was managed medically since then. Recently he suffered a NSTEMI while travelling in the USA and was treated medically as he sought to undergo investigations in Canada. He underwent Coronary Angiogram on 11/10/2010 by Dr. Fam which demonstrated multivessel coronary artery disease amenable to surgical revascularization.

Course in Hospital:

Uncomplicated post-operative course.

Issue for Follow-up/Investigation:

Family MD to discontinue staples on or after 11/26/2010.

Please note secondary prevention for patients with Coronary Artery Disease includes:

1. Hypertension management to achieve blood pressure of 140/90mm Hg
2. Lipid Management to achieve: LDL-C <2.0 mmol/L & TC/HDL-C <4.0 mmol/L
3. Moderate-intensity aerobic physical activity for a minimum of 30 min on 5 dys/wk or vigorous-intensity aerobic activity for a minimum of 20 mins on 3 dys/wk.
4. Influenza vaccination.

Cardiac rehabilitation is associated with significant long-term survival advantages after index cardiovascular hospitalizations. Family MD/Cardiologist to facilitate a referral to an Outpatient Cardiac Rehabilitation Program of choice.

Patient's Instructions:

Family MD to discontinue staples on or after 11/26/2010.
